ArtiDiag600

The TOPDON ArtiDiag600 OBD2 Scanner offers a comprehensive solution for people prioritizing safe travels. With diagnostics covering Engine, Transmission, SRS, and ABS, along with 8 reset functions, it caters to diverse automotive repair needs. Supporting over 70 vehicle brands with full OBD2 functionality, its AutoVIN Technology streamlines vehicle information retrieval. Free lifetime updates via hassle-free one-touch WiFi ensure its longevity and relevance. The 5" screen ensures easy and intuitive operation, while its support for the CAN-FD protocol ensures compatibility with modern automotive systems. Cost-effective, functional, and user-friendly, the ArtiDiag600 is an excellent choice for ensuring peace of mind on the road.

Question

What should I do if a communication error occurs?

Answer

Features

Follow the steps below to identify the problem:

- (1) Check to see if the ignition is ON.
- (2) Check to see if the ArtiDiag OBD-II diagnostic cable is securely plugged into the vehicle's DLC port.
- (3) Turn the ignition off. Turn it on again after 10 seconds and continue the operation.
- (4) Check to see if the vehicle's control module is defective.
